### Types of newspaper

A **daily newspaper** is issued every day, often with the exception of Sundays and some national holidays. Saturday, and where they exist Sunday, editions of daily newspapers tend to be larger, include more specialized sections and advertising inserts, and cost more. Typically, the majority of these newspapers' staff works Monday to Friday, so the Sunday and Monday editions largely depend on content done in advance.

**Weekly newspapers** are also common and tend to be smaller than daily papers.

#### CHILE: MEMORIAL TO VICTIMS OF FEMICIDE KICKS OFF AWARENESS CAMPAIGN

Citizen Group Says 37 Women Have Been Victims Of Femicide In First Half Of 2007

(July 27, 2007) The Network Against Domestic and Sexual Violence in Chile initiated its campaign "¡CUIDADO! EL MACHISMO MATA" — Careful! Machismo Kills! — Thursday with solemn memorial services dedicated to victims of femicide. The organization used empty pairs of shoes to represent the more than 300 women who have been murdered because of their gender since 2001.

This is an excerpt taken from a newspaper which is published in Santiago. It is written in English. It is The Santiago Times.

Recuerde. No tiene que entender todas las palabras. No se asuste. Busque en el diccionario las palabras que le impiden entender la idea global.

### Hearing and/or Speech Impairments

Speech and hearing disorders alone do not generally interfere with computer use. However, modern speech synthesizers can substitute voices and thus provide a compensatory tool for students who cannot communicate verbally. Students with portable systems can participate in class discussions once adapted computers provide them with intelligible speaking voices. Word processing and educational software may also help students who are hearing impaired develop writing skills.

### Specific Learning Disabilities

Educational software where the computer provides multi-sensory experiences, interaction, positive reinforcement, individualized instruction, and repetition can be useful in skill building. Some students with learning disabilities who have difficulty processing written information can also benefit from completing writing assignments, tutorial lessons, and drill-and-practice work with the aid of computers. For example, a standard word processor can be a valuable tool for individuals with dysgraphia, an inability to produce handwriting reliability.
